Summary

I'm working as a senior consultant/developer for more than 20 years in various type of projects. Due to this diversified kind of working I gained comprehensive experience in the areas of sales, procurement, logistics, CRM, service-management, manufacturing and integration into finance system. I can also build on a long history as a developer using the entire tool set of JD Edwards EnterpriseOne. My years of experience and technical background allow me to provide realistic estimates for interfaces, customizations and data migrations.
